## SKILLS

PA & LIGHT

CONSULTING

GRAPHIC D.

WEB D.

I started my career of multimedia production in year 2009, when I got my (first) occasional job as a roadie in AZ Audio company.

During my career, I regularly collaborated with both minor and larger names from the circles of multimedia production.

During my many years of training and getting to know my profession activities in details I always diligently spread my personal equipment park.

After valuable years of experience, I eventually started to work as a consultant and organizer of the technical parts of events.

I am the advocate of the principle that every work that we do needs to be carried out quickly, effectively and aesthetically.

I am always striving for the goal that the organizer / customer is satisfied with the work of me and my team after the performed service.

In spite of all my knowledge, I still prefer to work with live audio (as a FOH engineer or roadie), which also includes 90 % of my work.

Every year, I am expanding our service activities, so our development and growth can be regularly followed on the various portals listed in the tab on the left.

If you have a question for me, contact me without hesitation, I always look forward to new collaborations with serious and professional customers.

## HOBBIES & INTERESTS

Researching new modern technologies and collecting of epic music albums.
